A LEGACY OF EXCELLENCE

Since 1983 Harney & Sons has been the source for fine teas. We travel the globe to find the best teas and accept only the exceptional. We put our years of experience to work to create blends beyond compare. Packing takes place at our Millerton location, so you are assured only the freshest teas. Never straying from our heritage and classic feel, we strive to stay ahead through new lines and innovative packaging. We have decades of food service experience, which we use to help drive your tea sales. Our focus is on your Total Tea Program: managing it from tea garden to tea cup.

Do you have questions?

Our tea consultants are available

Monday through Friday

from 9:00am to 5:00pm EST.

They are happy to assist you with placing your order, a prior purchase, or to help you make a decision about teas, teaware or training.

BREWING BASICS

White Tea

Minimally processed, white teas are among the world's rarest. Hand plucked, unopened buds brew up into a subtle blend of sweetness and vegetal flavors. The best white teas are from Fujian province in China, and Sri Lanka.

Green Tea

Green teas are the most ancient of teas. Produced both in China and Japan, production methods vary but the focus is always to fix the green color. We're happy to offer a stimulating selection of gorgeous, green teas.

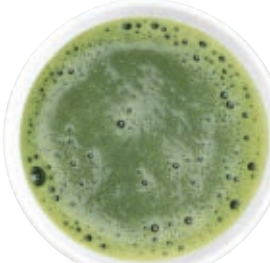

Oolong Tea

Partially oxidized, Oolong teas are in between green and black. They likely first appeared 300 years ago in China's coastal Fujian province. If you are new to Oolongs, we recommend trying our Ti Quan Yin, Fanciest Formosa Oolong, or Milky Oolong varieties.

Matcha Tea

Matcha is vital, powdered green tea leaves packed with antioxidants that is delicious and energizing. Originally used for the Japanese Tea Ceremony, our customers have come to love its vegetal taste, unique preparation style, and our flavorful fruit-flavored Matchas.

Black Tea

Black teas range from mellow teas from China to full-bodied teas from Assam, India. Black teas are withered, rolled, fully oxidized, and oven-fired which creates many warm, toasty flavors.

Herbal Tisanes

Whether you call them infusions, tisanes or "teas," these exclusive brews and blends are made from roots, flowers, leaves and seeds. Herbals have a long tradition in many cultures, and ours are delectable and caffeine free.

Quality of the Tea

Harney & Sons offers the highest quality tea leaves you can steep. We select full leaf teas from the finest tea gardens and estates. Like fine wines, styles of tea also vary by each tea estate and garden, depending on the geography, climate and farming practices. A good pot of tea cannot be made from inferior tea. You need great tea!

Fresh, pure water

If need be, water should be filtered. Hard water, sulphurous water or chlorinated water will affect the taste of your tea.

Condition and freshness

Tea should be stored in sealed containers away from light in a cool place. Because tea picks up flavors and odors from foods around it, keep coffee and spices away from your tea. It's important to properly rotate your teas on your shelf or in your drawer. Put the oldest at the front (marking it with the date "in") and use it first. When you buy the best tea, you should enjoy it at its best.

Brewing the perfect cup

Heat your pot by filling it with boiling water. Recycle the water. Use one teaspoon, tea bag or tea sachet for each cup of tea desired. Follow the steeping instructions for each tea, as each has their own required time and temperature. Once the steeping time is reached, remove tea, tea bag or sachet to achieve the perfect strength. A timer will help you make it "spot on." Enjoy.

Proper Steeping Temperatures & Time

White Teas	175° F	3 minutes
Green Teas	160°–175° F	1–3 minutes
Oolong Teas	180°–212° F	3–4 minutes
Darjeelings	175°–212° F	3–4 minutes
Black Teas	212° F	5 minutes
Herbals	212° F	5 minutes

Suggested brewing times apply for loose tea, sachets or tea bags.

31641 4 x 20 Tin of Sachets

ART TEAS

Certainly a sight to behold, art teas take tea drinking to another level. For most teas the taste of the tea is most important but here the focus is on the visual appeal. The large white buds have a subtle flavor. When you place your tea buds into hot water, the bulb blossoms revealing a beautiful flower inside.

Dancing Snowflakes

GET BUZZED

Yaupon is an inspired American comeback. Ranchers cleared this caffeinated native holly from scrubland, but we found it on a Texas farm. Our bright peppermint hails from Washington State, earthy guayusa holly comes from Ecuador, and evergreen yerba mate is shade-grown in Argentina.

THE HEMP DIVISION

BIOAVAILABLE INFUSIONS

Our Mission

Our body-relaxing, mood-elevating infusions deliver a cool, calm & delicious experience like no other. We strive to make it all just a little nicer, in everything that we do. Natural, honest & potent products from The Hemp Division.

What makes The Hemp Division different?

- Our hemp extract is grown, extracted and isolated in the USA.
- Our extract is made using a clean extraction method. There are several ways to extract oil from hemp. Some methods use harsh chemicals that can be difficult to fully remove from the final product.
- Our extract is highly bioavailable with rapid absorption, therefore you feel the effects more readily!
- We third party test our extract to ensure purity & potency of the product (you get what you pay for).
- We don't mislead about the amount of hemp in our products. Other companies list total contents of the container, not the content of hemp per serving, so you aren't getting as much as you think.
- Our products are produced at a SQF certified, GMP facility.
- We use unique ingredients, and have highquality blends, with caffeinated or caffeine-free options (balanced energy). We use natural sugars (pure cane or organic honey) to sweeten.
- We grew our own hemp in the 2019 growing season, from the roots up.

Committed to making the highest quality product, our philosophy begins from the roots up, carefully tending to our 7,000 hemp plants at the Big Cat Ranch in Millerton, N.Y. Bees contribute tremendously to the health of our plants and the larger ecosystem. It was a natural choice to have hives in our field.

Taste Nirvana was created by father-son team – Jack & Kris Wattanaporn – to share their love of Thailand’s flavors. Before immigrating to the U.S. to lay down roots, Jack grew up in Thailand where for hundreds of years, coconut water has been as loved and familiar a hydration beverage as orange juice is in the U.S. For the past 35 years, our Thai foodie family has been devoted to bringing the best quality Thai coconut water, teas, and coffees to market throughout the world. For over three generations we have been committed to being green in every way possible. We are proud of our Sustainable-Wood-For-Fuel which helps supply responsible natural-energy. One of our main plant hallmarks is our eco-conscious natural water treatment system. Waste water materials are naturally removed through biological process by running wastewater through our aquatic plants, so that the converted water may be safely returned to the environment. The foundation and core principle of Taste Nirvana is built on a never ending promise to bring your family the best tasting Thai beverages using the freshest and most premium ingredients in the most natural and eco-friendly way possible. We look forward to sharing our products with you.

1% FOR THE PLANET

Photo courtesy of the Ocean Conservancy

Harney & Sons Tea Company sells fine teas at a price that makes tea an everyday luxury. Our tea is sipped 'round the world in homes, hotels, restaurants, cafes and on cruise ships. The process of shipping tea from the world's tea gardens to Harney & Sons' production facility for blending, bagging and packing, then on to the world's teacups, impacts our increasingly fragile environment. What could we do to give back to the environment that grows the tea of the world? In 2006, Michael and Paul Harney decided membership in 1% For The Planet would provide Harney & Sons with the opportunity to drive positive environmental change in our geographical region. Our production facility is located in Upstate New York surrounded by the beautiful mountains that make up the Berkshire Range. We are minutes from the Appalachian Trail. Our facility is located between the Hudson River to our west and the Housatonic River to our east. Joining 1% FTP meant we could directly donate one percent of our total sales to the environment. The Harney family and staff are very proud to be part of this fine global organization working toward protection of the environment 1% at a time. We support the following 1% FTP non-profits, particularly Appalachian Trail Conservancy. As of this year Harney & Sons (with your help) will have donated nearly 3 million dollars to 1% for the Planet.

Through 1% for the Planet, we support the following non-profits:

- Scenic Hudson
- CT Farmland Trust
- Housatonic Valley Association
- Appalachian Trail Conservancy
- Clean Air- Cool Planet
- Pacific Forest Trust
- Ocean Conservancy
- Nature Conservancy
- Engineering for the Earth
- Central Park Conservancy
- Conservation International

We also pay annual membership dues to 1% FTP to help this exemplary organization defray its overhead costs. We encourage our business associates to visit their website: www.onepercent-fortheplanet.org or e-mail: info@onepercentfortheplanet.org for more information.
