

HEMP INFUSED

# CYNERGY

COFFEE & TEA

# Brew Something Good with Cynergy's All Organic and Hemp Infused Drinks.

We start by combining our in-house roasted gourmet coffee and tea blends with full spectrum hemp oil to give you a beautiful combination of a lively, yet relaxed beverage.

Cynergy provides a consistent dosage of 25mg of full spectrum hemp oil in every cup of coffee and tea.

# Packed Fresh in Recyclable or Compostable Capsules.

Cynergy comes packaged in recyclable and/or compostable pods that are compatible with all K-Cup® and Nespresso brewers.

High oxygen barrier cups are flushed with nitrogen to preserve freshness and extend shelf life.

# Every Cup is Infused with Full Spectrum Hemp Oil.

## Organically Sourced Hemp

Cynergy sources the best-in-class hemp-derived full spectrum oil from licensed hemp manufacturers in the United States using the most effective cannabinoid solvents that can produce an efficient extraction, while retaining high terpene content, and is also safe for consumption in its raw solvent form.

# Why We Are Different?

Cynergy has developed a proprietary formulation and process to infuse full spectrum hemp oil into every single-serve coffee and tea pod. We focus on quality and flavor.

## Superior Taste

Cynergy's formulations and organic blends are combined to give a superior tasting beverage experience

## Accurate Dosing

We deliver reliable titration rate through single-serve pods solving the industry-wide problem of inaccurate dosing.

## Eco- Friendly

All of our packaging and coffee and tea capsules come in recyclable and/or compostable pods.

## 3<sup>rd</sup> Party Lab Tested

Cynergy's proprietary formulation is third-party lab tested to provide transparency and product quality assurance.
